

ARROW REVEALCUT™

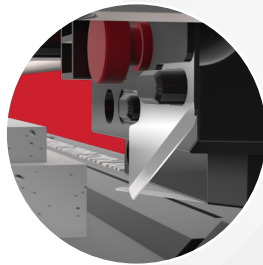

INTRODUCING THE MOST SIGNIFICANT
INNOVATION IN CEILING TILE-CUTTING HISTORY

One of the most significant innovations ever in the commercial ceiling industry, RevealCut, from Arrow Fastener, is the first-ever all-in-one precision workstation that eliminates the need to cut ceiling tiles with a square and utility knife. Available in two convenient sizes – one for 2' tiles and a larger version for 4' tiles – the workstation utilizes new blade technology designed specifically for cutting tough, fibrous ceiling tiles.

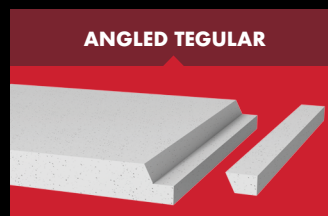

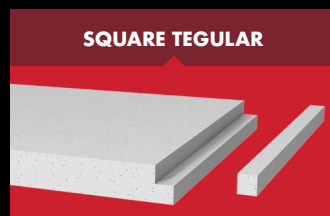

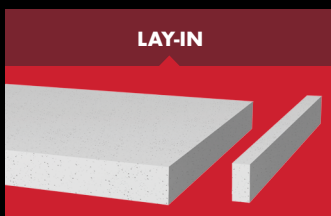

By eliminating manual cutting and reducing the number of blade changes, RevealCut can decrease jobsite accidents while increasing cutting speed and worker confidence. But that's just the beginning. Conquer ceiling installs in a fraction of the time, at a fraction of the cost, with precise results and minimal waste. The commercial ceiling industry was due for something this revolutionary. See it pay for itself on your next job.

KEY WORKSTATION FEATURES

- 30-second cuts
- 72 cut configurations
- Save up to 80% on labor costs and waste
- First blade designed specifically to cut ceiling tiles
- Jig system for fast and consistent repetitive linear cuts

FACTORY-EDGE PROFILE CUTS

RevealCut is the culmination of Arrow Fastener's commitment to innovation, manufacturing excellence, and passion for developing high-performing tools that make the job easier. For more information on RevealCut, and to learn about commercial opportunities for the workstation, visit revealcut.com.
