MIMOSA Pro

Skin tissue imaging insights in the palm of your hand.

3 IMAGES IN 1 CAPTURE

Capture tissue oximetry, temperature, and digital images in less than one second without requiring patient contact.

AI-DRIVEN INSIGHTS

Improve patient outcomes with real-time point-of-care insights that help drive informed decisions about next steps in care.

HIPAA-COMPLIANT WEB PORTAL

Gain real-time validation into efficacy of treatment modalities and proactively adapt care plans to improve patient outcomes.

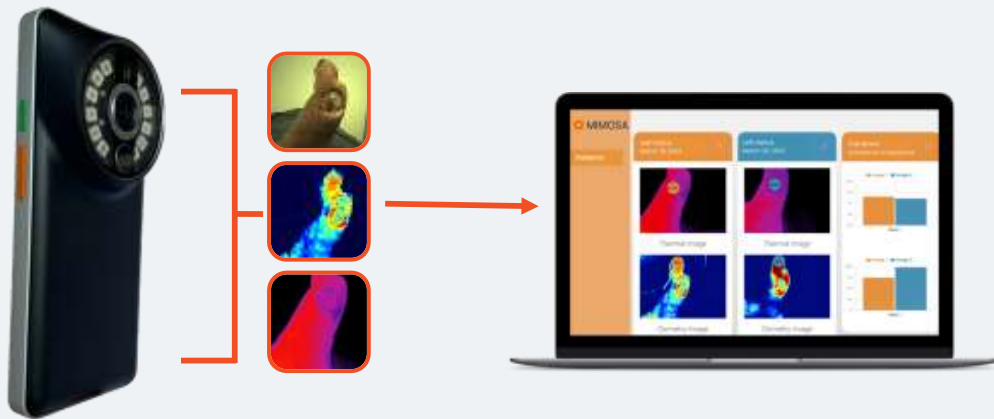

ALL HEALTHCARE PROFESSIONALS

Pocket-sized lightweight technology that can fit seamlessly into existing workflows and be used by any healthcare professional in any health setting.

REIMBURSABLE

Access ready-to-export reimbursement documentation specific to each patient case in the MIMOSA web-portal.

MIMOSA Pro

Skin tissue imaging insights in the palm of your hand.

① Capture a MIMOSA image.

Images uploaded to a HIPAA-compliant portal.

② Track patient progress over time
Big Data = Big Insights

Workflow Efficiency for Doctors,
Nurses and Patients

③ Triage and Treat with virtual
clinician collaboration

MIMOSA Pro | Clinical Workflow

The MIMOSA Pro integrates seamlessly into existing clinical workflows.

QUANTIFY WOUND ASSESSMENT

Is there enough oxygen or perfusion in the tissue to determine next steps in treatment.

DETERMINE VASCULAR EFFICACY

Assess procedure efficacy by comparing pre and post vascular intervention.

DETERMINE HBOT EFFICACY

Measure pre and post hyperbaric oxygen therapy to determine the efficacy of the treatment.

ASSESS AMPUTATION REQUIRED

Is there adequate tissue oxygenation to heal the wound or is amputation required and if so to what degree.

MONITOR WOUND PROGRESSION

Is the wound on a healing trajectory?
Monitor perfusion and oxygenation over time.

DOCUMENT DEBRIDEMENT

Document the adequacy of debridement and wound bed preparation for a skin substitute.
