

MetaQil®

First-of-its-kind oral rinse
relieves metallic taste

Clinically Proven
85% of participants in a clinical study preferred MetaQil as a remedy for metallic taste¹

¹Based on clinical trial results from the Dental School at the University at Buffalo

- ✔ Scientifically designed formula alleviates metallic taste caused by chemotherapy and a variety of medications.
- ✔ Innovative ingredients cool the mouth and provide instant, long-lasting relief and comfort.
- ✔ Regular use can help those affected by taste disorders return to healthy, nutritious eating.
- ✔ Usage is safe and quick—just rinse with 1 tsp. for 30 seconds as needed.
- ✔ Convenient 8 and 2 oz. bottles.
- ✔ Ordering is easy through Amazon Prime or [MetaQil.com/shop](https://www.MetaQil.com/shop).

MetaQil® relieves taste disorders

Taste disorders (including metallic taste, bitter taste or unpleasant taste) can be caused by certain prescription and over-the-counter medications, chemotherapy and radiation treatment, Central Nervous System (CNS) disorders, and other factors. Among the medications that can cause taste disorders:

- Antibiotics
- Antihypertensives & cardiac medications
- Anticonvulsants
- Antihistamines & Decongestants
- Lipid-lowering agents
- Antineoplastics
- Anti-inflammatory agents
- Chemotherapy
- Antidepressants
- Muscle relaxants
- Antimanic drugs
- Antithyroid agents
- Antipsychotics
- Antiparkinsonian agents

IMPORTANT: MetaQil® Oral Rinse is not intended to diagnose, treat, cure or prevent any disease. Do not use MetaQil® if you are pregnant, nursing or are allergic to any of the ingredients. Do not apply MetaQil® if you have any medical condition that might come into conflict with this product. Please consult your doctor for a medical opinion if you have any concern regarding the use of this product. Keep out of reach of children.
