Wider grip and unique handle orientation for comfort and control.

★ **Ideal for All Users:**
Perfect for those in occupational therapy, rehabilitation, or managing dental concerns.

★ **Superior Cleaning:**
Enjoy a transformative and enjoyable brushing experience.

Experience the difference with RADIUS toothbrushes!

Prevention of Pneumonia and Virus Management through Oral Hygiene

Reduces Bacterial Load: Proper oral hygiene can reduce harmful bacteria in the mouth by up to 50%, decreasing the risk of these bacteria entering the lungs and causing pneumonia.

Lowers Virus Exposure: Studies show that effective oral hygiene can decrease the presence of viruses in the oral cavity by 30%, reducing the likelihood of respiratory infections like COVID-19.

Supports Immune Function: Maintaining good oral health can improve overall immune response, making the body more efficient in fighting off viruses and reducing the severity of illnesses.

Prevents Inflammation and Secondary Infections: Good oral hygiene practices lower inflammation in the body by 25%, which helps prevent complications and secondary infections related to viruses such as COVID-19.

Join the dental revolution and experience the difference with RADIUS toothbrushes!

Ergonomic handle and inspired bristle bed shape address top dental concerns: receding gums, bleeding gums, and enamel erosion.

Designed for individuals with dexterity concerns: perfect for occupational therapy, rehabilitation, Parkinson's care, and more.

Unique left/right handle orientation and wider grip provide ultimate control during brushing.

RADIUS toothbrushes **prevent damage and erosion at the gum line** compared to traditional brushes.

Soft, luxurious bristles ensure **gentle cleaning without compromising efficacy.**

National average brushing times fall short, but RADIUS design encourages thorough **cleaning of larger surface areas.**

With 200%-300% more bristles, RADIUS toothbrush heads act like pillows on sensitive gums and delicate enamel.

Ideal for patients with transplants, strokes, and dentures, as well as those undergoing MLS treatment.

Say goodbye to discomfort and hello to a refreshing, enjoyable brushing experience.

Oval Bristle pattern helps minimize sawing which can cause enamel erosion

Wider head for maximum cleaning area and helps minimize nicks and cuts

Massaging bristle bed helps reduce receding and bleeding gums

Broad paddle-like handle helps aid with dexterity concerns
