A matcha made in heaven
I highly recommend if you're into natural tooth care. Not only does it taste great, but it feels clean too. I have tried many natural toothpastes and this one is one of my favorite.

My kids LOVED LOVED this! I am buying some more for Christmas stockings. Organic! Mum couldn't ask for more!

Wonderful fluoride-free toothpaste!

OMG, totally safe ingredients, easy to brush with and it does not have an overwhelming mint taste. I get SO tired of the excess mint in most toothpaste, especially the fluoride free versions so this is great. I will be using this forever.

RADIUS® is a better care company inspired by nature and designed with purpose for a better you & a better world.

Started by an architect, we set out on a mission to make everyday objects that are better for people and better for the environment. We started by solving an everyday problem with a simple object, the toothbrush.

And we had a simple idea: In a sea of false claims and absurd features, we took a different path - to create a more honest and effective product.

We applied ergonomic design and luxury materials to engineer a toothbrush that cleans better in your mouth, feels better in your hand, and treats the planet better with a focus on sustainability.

And that was just the start. We've taken that philosophy and vision of EVERY DAY BETTER to create sustainable toothpastes, flosses, and other daily use objects we think you'll love too.

Our process is transparent: We use earth-friendly materials and sustainable manufacturing, even owning and operating our own factory right here in the US. We're also proudly women-owned and operated and family-run, ensuring every product is designed for a better you and a better world.

Our message is clear: Your mouth deserves better, and so does the environment.

Join us in this movement of a Better Cleaning for a Better World.
