*Vein-Eye® Carry*

The next step in Vein visualization Technology

## High Definition Vein Detection

- Features real-time high-definition visualization (1920 X 1080)

## Lightweight & Portable

- Designed with mobility in mind. Weighing only five (5) lbs, offering unparalleled convenience

## Versatile Application

- Suitable for use in emergency departments, pre-op, and nursing floors
- The Vein-Eye® technology excels at enhancing vein visualization under challenging circumstances

## Ambulance Ready

- Designed with ambulance use in mind, featuring a portable camera arm that guarantees uninterrupted vein visualization during patient transport.

## Hands-Free Convenience

- Offers an intuitive hands-free modality, enabling efficient multitasking while ensuring optimal patient care.
